Transferring research to policy makers and practitioners:
Experiences from the fields of security and justice and development aid

Frans L Leeuw
Netherlands Institute of Security and Justice Research (WODC) Den Haag & Maastricht University
Some characteristics of research, transfer and utilization in the field of security and justice in western countries

- Long time (senior) legal scholars and “bow tie professors” the dominant actors;

- now: also technology folks, behavioral scientists, neuroscientists, evaluators………ánd senior lawyers are part of the picture
Some characteristics of research, transfer and utilization in the field of security and justice in western countries

- “own” (semi-independent) research (and brokerage) institutions; operating at arms length from Ministries, public prosecutor, police, judges etc.;
- Translational criminology (as one of the goals of these institutions);
- Multi-actor programming of research (questions);
- Portals / repositories
About CrimeSolutions.gov

The Office of Justice Programs' CrimeSolutions.gov uses rigorous research to inform practitioners and policy makers about what works in criminal justice, juvenile justice, and crime victim services.

On CrimeSolutions.gov you will find:

- Research on program effectiveness reviewed and rated by CrimeSolutions.gov Researchers and Reviewers (Link for Using CrimeSolutions.gov)
- Easily understandable ratings based on the evidence that indicates whether a program achieves its goals: (Program Review and Ratings: From Start to Finish)
  - Effective
  - Promising
  - No Effects
- Key program information and research findings (Search Programs)

Kennisbank Criminaliteits preventie

U bevindt zich op de website van de Kennisbank Criminaliteitspreventie. Hier wordt bijgehouden wat bekend is over de effectiviteit van straffen en maatregelen ter bestrijding van criminaliteit en overlast. De informatie op de site is ontleend aan onderzoek uit binnen- en buitenland. Het gaat zowel om

interventies gericht op daders of verdachten als ook om de werking van

meer algemene maatregelen op het gebied van criminaliteitspreventie.

De site is opgebouwd uit een aantal deelgebieden. Er is deel waarmee

beschrijvingen zijn opgenomen van de strafrechtelijke interventies die wij in

Nederland kennen en een gedeelte waarin het wetenschappelijk onderzoek

naar de werking van interventies op een toepaselijke wijze wordt

samengesteld. Via een menubesturing kunt u in elk van de gebieden zoeken

naar de gewenste informatie. Maar u kunt ook de gehele website bezoeken

door in het vak hieronder een vrije zoekterm in te vullen.

Some characteristics of research, transfer and utilization in the field of security and justice in western countries

- Accreditation committees: ex ante testing behavioral intervention programs; these committees are empowered to accept, modify or delete the reviewed programs;

- Social networking between researchers from different fields and through ‘kenniskamers’ with senior policy officials, including politicians.
Some characteristics of research, transfer and utilization in the development aid field

- International empirical benchmarking through DAC OECD, World Bank, other Development Banks etc.;
- Bottom up networks like NONIE: the Network of Networks of Impact Evaluators and other global policy networks;
- Semi-independent ‘own research organizations’, operating at arms’ length from governments;
Some characteristics of research, transfer and utilization in the development aid field

- Multi-actor research programming;
- Strong collaboration between private and public organizations;
- Again: the role of repositories;
- Ipdet and Ipdet lookalikes: practice-oriented high level [global] training programs on development evaluation incl utilization;
HOW TO VALUATE THESE ACTIVITIES IN THESE FIELDS?
Strategies to promote the impact of systematic reviews on healthcare policy: a systematic review of the literature

<table>
<thead>
<tr>
<th>Factor</th>
<th>Security &amp; Justice field</th>
<th>Developmental aid field</th>
</tr>
</thead>
<tbody>
<tr>
<td>Social capital / relational assets between researchers-policy makers/practitioners</td>
<td>“kenniskamers'; long tradition of interaction between research &amp; legal work</td>
<td>Networks, both institutional (DAC OECD) and bottom up (NONIE); interactions between NGO's and the North &amp; the south. But also: the risk of capture; investing in global (academic) development evaluation and utilization training programs;</td>
</tr>
<tr>
<td>Time</td>
<td>“Own”, ‘at arms length’ of the Justice Ministries operating research &amp; brokerage institutions are instrumental for an adequate time management….</td>
<td>Similar development; programming of studies related to the agenda of international benchmarking organizations like the DAC OECD is an incentive to deliver research results ‘just in time’;</td>
</tr>
<tr>
<td>‘knowledge marketing’ aspects</td>
<td>Easy accessible Portals; clearing houses (bottom up); databases; interaction between researchers/brokers and users;</td>
<td>Portals like J-Pal, 3ie; private and public cooperation (CGIAR);</td>
</tr>
